Advanced Programming [AP-2017]  
Second Programming Assignment - Instructions

1) The second programming assignment consists of a single task, divided in several exercises for the ease of presentation. The evaluation of its solution will contribute to the final grade of the exam. Students not having submitted a solution to this assignment cannot take the final oral exam.

2) The solution to the assignment should be sent by email to the lecturer (andrea@di.unipi.it), indicating clearly in the Subject: “[AP-2017] Solutions to Assignment 2”. Only the source java files have to be submitted, as attachments to the email.

3) **Deadline**: Students are invited to solve the exercises and to submit the solutions as soon as possible. The strict deadline is December 17, 2017. Exceptions are possible for strongly motivated reasons, to be discussed with the lecturer.

4) Submissions are individual. Students can cooperate when solving the problems, but each student is responsible of his/her own solutions and must be able to comment the code and the design choices.
