

# Java and the Java Virtual Machine

Robert Stärk, Joachim Schmid, Egon Börger

April 4, 2003

The contents of Jbook. This document is not for distribution. The Home-Page of Jbook is

<http://www.inf.ethz.ch/~jbook/>

where this document and more information about Jbook is available.

# Contents

<b>1. Introduction</b> .....	1
1.1 The goals of the book .....	2
1.2 The contents of the book .....	3
1.3 Decomposing Java and the JVM .....	7
1.4 Sources and literature .....	11
<b>2. Abstract State Machines</b> .....	15
2.1 ASMs in a nutshell .....	15
2.2 Mathematical definition of ASMs .....	18
2.2.1 Abstract states .....	18
2.2.2 Transition rules and runs .....	22
2.2.3 Syntactic sugar .....	25
2.2.4 Exercises .....	26
2.3 Notational conventions .....	27

---

## Part I. Java

---

<b>3. The imperative core <math>\text{Java}_{\mathcal{T}}</math> of Java</b> .....	33
3.1 Static semantics of $\text{Java}_{\mathcal{T}}$ .....	33
3.1.1 Syntax of $\text{Java}_{\mathcal{T}}$ .....	34
3.1.2 Type checking of $\text{Java}_{\mathcal{T}}$ .....	37
3.1.3 Vocabulary of $\text{Java}_{\mathcal{T}}$ .....	38
3.2 Transition rules for $\text{Java}_{\mathcal{T}}$ .....	39
3.2.1 Expressions .....	40
3.2.2 Statements .....	41
3.2.3 Derived language constructs .....	44
3.2.4 Exercises .....	45
<b>4. The procedural extension <math>\text{Java}_{\mathcal{C}}</math> of <math>\text{Java}_{\mathcal{T}}</math></b> .....	47
4.1 Static semantics of $\text{Java}_{\mathcal{C}}$ .....	47
4.1.1 Syntax of $\text{Java}_{\mathcal{C}}$ .....	47
4.1.2 Class members .....	50
4.1.3 Interface members .....	52

4.1.4	Accessibility, visibility, hiding and overriding . . . . .	53
4.1.5	Static type checking . . . . .	58
4.1.6	Overloaded methods . . . . .	58
4.1.7	Vocabulary of Java <sub>C</sub> . . . . .	61
4.2	Transition rules for Java <sub>C</sub> . . . . .	63
4.2.1	Exercises . . . . .	66
5.	<b>The object-oriented extension Java<sub>O</sub> of Java<sub>C</sub></b> . . . . .	71
5.1	Static semantics of Java <sub>O</sub> . . . . .	71
5.1.1	Operators for reference types . . . . .	72
5.1.2	Syntax of Java <sub>O</sub> . . . . .	72
5.1.3	Constructor declarations . . . . .	73
5.1.4	Field access expressions . . . . .	74
5.1.5	Overloaded methods . . . . .	75
5.1.6	Instance creation expressions . . . . .	77
5.1.7	Type checking of Java <sub>O</sub> . . . . .	78
5.1.8	Vocabulary of Java <sub>O</sub> . . . . .	78
5.2	Transition rules for Java <sub>O</sub> . . . . .	80
5.2.1	Exercises . . . . .	83
6.	<b>The exception-handling extension Java<sub>E</sub> of Java<sub>O</sub></b> . . . . .	87
6.1	Static semantics of Java <sub>E</sub> . . . . .	87
6.1.1	Vocabulary of Java <sub>E</sub> . . . . .	89
6.2	Transition rules for Java <sub>E</sub> . . . . .	89
6.2.1	Exercises . . . . .	93
7.	<b>The concurrent extension Java<sub>T</sub> of Java<sub>E</sub></b> . . . . .	95
7.1	Static semantics of Java <sub>T</sub> . . . . .	96
7.1.1	Vocabulary of Java <sub>T</sub> . . . . .	96
7.2	Transition rules for Java <sub>T</sub> . . . . .	98
7.2.1	Scheduling of multiple threads . . . . .	101
7.2.2	Thread methods . . . . .	103
7.2.3	Exercises . . . . .	105
7.3	Thread invariants . . . . .	106
8.	<b>Java is type safe</b> . . . . .	111
8.1	Structural properties of Java runs . . . . .	111
8.2	Unreachable statements . . . . .	117
8.2.1	Exercises . . . . .	119
8.3	Rules of definite assignment . . . . .	121
8.3.1	Exercises . . . . .	125
8.4	Java is type safe . . . . .	126

---

**Part II. Compilation of Java: The Trustful JVM**

---

<b>9.</b>	<b>The <math>\text{JVM}_{\mathcal{I}}</math> submachine</b>	139
9.1	Dynamic semantics of the $\text{JVM}_{\mathcal{I}}$	139
9.2	Compilation of $\text{Java}_{\mathcal{I}}$	142
<b>10.</b>	<b>The procedural extension <math>\text{JVM}_C</math> of <math>\text{JVM}_{\mathcal{I}}</math></b>	147
10.1	Dynamic semantics of the $\text{JVM}_C$	147
10.2	Compilation of $\text{Java}_C$	153
<b>11.</b>	<b>The object-oriented extension <math>\text{JVM}_O</math> of <math>\text{JVM}_C</math></b>	155
11.1	Dynamic semantics of the $\text{JVM}_O$	155
11.2	Compilation of $\text{Java}_O$	157
<b>12.</b>	<b>The exception-handling extension <math>\text{JVM}_E</math> of <math>\text{JVM}_O</math></b>	159
12.1	Dynamic semantics of the $\text{JVM}_E$	159
12.2	Compilation of $\text{Java}_E$	163
<b>13.</b>	<b>Executing the <math>\text{JVM}_N</math></b>	165
<b>14.</b>	<b>Correctness of the compiler</b>	167
14.1	The correctness statement	167
14.1.1	The equivalence of <i>pos</i> and <i>pc</i>	169
14.1.2	The equivalence of <i>restbody</i> and <i>opd</i>	169
14.1.3	The equivalence of <i>locals</i> and <i>reg</i>	171
14.1.4	The equivalence of <i>frames</i> and <i>stack</i>	171
14.1.5	Equivalence of states	174
14.2	The correctness proof	178

### Part III. Bytecode Verification: The Secure JVM

<b>15.</b>	<b>The defensive virtual machine</b>	209
15.1	Construction of the defensive JVM	210
15.2	Checking $\text{JVM}_{\mathcal{I}}$	210
15.3	Checking $\text{JVM}_C$	213
15.4	Checking $\text{JVM}_O$	214
15.5	Checking $\text{JVM}_E$	219
15.6	Checking $\text{JVM}_N$	221
15.7	Checks are monotonic	222
<b>16.</b>	<b>Bytecode type assignments</b>	223
16.1	Problems of bytecode verification	224
16.1.1	Why are subroutines problematic?	224
16.1.2	Why sets of reference types?	229
16.2	Successors of bytecode instructions	231
16.2.1	Successors for $\text{JVM}_{\mathcal{I}}$ instructions	232
16.2.2	Successors for $\text{JVM}_C$ instructions	232

16.2.3 Successors for $\text{JVM}_{\mathcal{O}}$ instructions . . . . .	233
16.2.4 Successors for $\text{JVM}_{\mathcal{E}}$ instructions . . . . .	234
16.3 Type assignments without subroutine call stacks . . . . .	236
16.4 Soundness of bytecode type assignments . . . . .	242
16.5 Certifying compilation . . . . .	252
<b>17. The diligent virtual machine</b> . . . . .	273
17.1 Principal bytecode type assignments . . . . .	273
17.2 Verifying $\text{JVM}_{\mathcal{T}}$ . . . . .	275
17.3 Verifying $\text{JVM}_{\mathcal{C}}$ . . . . .	279
17.4 Verifying $\text{JVM}_{\mathcal{O}}$ . . . . .	283
17.5 Verifying $\text{JVM}_{\mathcal{E}}$ . . . . .	283
17.6 Verifying $\text{JVM}_{\mathcal{N}}$ . . . . .	286
<b>18. The dynamic virtual machine</b> . . . . .	289
18.1 Initiating and defining loaders . . . . .	289
18.2 Loading classes . . . . .	290
18.3 Dynamic semantics of the $\text{JVM}_{\mathcal{D}}$ . . . . .	291
18.3.1 Refinement of the run-time state . . . . .	291
18.3.2 Loading references . . . . .	294
18.3.3 The trustful $\text{JVM}_{\mathcal{D}}$ . . . . .	298
18.3.4 The defensive $\text{JVM}_{\mathcal{D}}$ . . . . .	302
18.3.5 The diligent $\text{JVM}_{\mathcal{D}}$ . . . . .	303
18.3.6 Exercises . . . . .	303

---

## Appendix

---

<b>A. Executable Models</b> . . . . .	305
A.1 Overview . . . . .	305
A.2 Java . . . . .	306
A.2.1 Completing the Java ASM . . . . .	307
A.2.2 Starting the machine . . . . .	308
A.2.3 Introduction to the GUI . . . . .	308
A.2.4 Running an example . . . . .	310
A.2.5 Breakpoints . . . . .	311
A.2.6 Examples on the CD . . . . .	312
A.3 Compiler . . . . .	312
A.3.1 Completing the Compiler ASM . . . . .	312
A.3.2 Starting the machine . . . . .	312
A.3.3 Introduction to the GUI . . . . .	313
A.3.4 Examples on the CD . . . . .	314
A.4 Java Virtual Machine . . . . .	314
A.4.1 Completing the JVM ASM . . . . .	315
A.4.2 Starting the machines . . . . .	316

A.4.3	Introduction to the GUI . . . . .	316
A.4.4	Examples on the CD . . . . .	319
A.4.5	Dynamic Loading – Saraswat’s Example . . . . .	319
<b>B.</b>	<b>Java . . . . .</b>	<b>323</b>
B.1	Rules . . . . .	323
B.2	Arrays . . . . .	331
<b>C.</b>	<b>JVM . . . . .</b>	<b>335</b>
C.1	Trustful execution . . . . .	335
C.2	Defensive execution . . . . .	343
C.3	Diligent execution . . . . .	344
C.4	Check functions . . . . .	347
C.5	Successor functions . . . . .	348
C.6	Constraints . . . . .	349
C.7	Arrays . . . . .	351
C.8	Abstract versus real instructions . . . . .	355
<b>D.</b>	<b>Compiler . . . . .</b>	<b>361</b>
D.1	Compilation functions . . . . .	361
D.2	maxOpd . . . . .	363
D.3	Arrays . . . . .	364
<b>References . . . . .</b>	<b>365</b>	
<b>List of Figures . . . . .</b>	<b>369</b>	
<b>List of Tables . . . . .</b>	<b>373</b>	
<b>Index . . . . .</b>	<b>375</b>
