

# Advanced Programming [AP-2021]

## First Programming Assignment - Instructions

---

- 1) The evaluation of the programming assignments will contribute to the final grade of the exam. Students not having submitted solutions to the assignments cannot take the final oral exam.
- 2) The solutions to the exercises should be sent by email to the lecturer ([andrea@di.unipi.it](mailto:andrea@di.unipi.it)) and to Laura ([laurabussi@live.it](mailto:laurabussi@live.it)), indicating clearly in the Subject: “[AP-2021] Solutions to Assignment 1”. For each exercise, the text of the assignment describes the expected format of the solution.
- 3) In case you want to send the solutions as attachments, take into account that **Gmail** filters out **.jar** attachments, even if in archives. As the lecturer uses Gmail, please change the suffix of **.jar** files into **.raj** before sending them.
- 4) **Deadline:** The suggested deadline is **December 5, 2021**, but students are free to postpone it. The hard constraint is that the lecturer must receive the solutions to the exercises **at least 10 working days before the date fixed for the oral exam**.
- 5) Submissions are individual. Students can cooperate when solving the problems, but each student is responsible of his/her own solutions, must be able to comment the code and the design choices, and must be able to modify the code upon request.
